

PRESS KIT

1. The Company

EP Produzione is an EPH Group subsidiary managing the power generation assets in Italy. The Company, the 5° power generation player in the Country, operates a total generation capacity of 4.3 GW through five gas-fired power plant and one coal-fired power plant. EP Produzione efficient and high-performance power plants have obtained the EMAS environmental registration, the ISO 14001 environmental certification and have acquired the OHSAS certification for workers' health and safety:

- **Fiume Santo (SS)** - thermoelectric plant powered by two coal-fired generation groups. With a net installed capacity of around 600 MW, it is one of the most important industrial facilities in northwestern Sardinia. The plant is controlled by a monitoring network around the station for measuring ground-level pollutants (sulfur oxides, nitrogen oxides and particulates). The plant is also allowed to burn biomass in co-combustion in the existing coal units.
- **Livorno Ferraris (VC)** - it is a combined cycle plant with a net installed capacity of 805 MW, consisting of two gas turbine units and a steam turbine. The plant, which is owned by EP Produzione Centrale Livorno Ferraris S.p.A. (EP Produzione S.p.A. 75% and BKW Italia S.p.A. 25%), came into operation in 2008 and it is located in the municipality of the same name in the province of Vercelli (Piedmont).
- **Ostiglia (MN)** - located in the province of Mantua (Lombardy), on the left bank of the river Po, Ostiglia power plant has a net installed capacity of 1,137 MW. Three CCGT units (composed of 1 gas turbine and one steam turbine each) are currently in operation since the beginning of 2000s.
- **Tavazzano e Montanaso (LO)** - thermoelectric power plant consisting of two combined cycle modules that use only natural gas. It occupies an area of about 70 hectares in the province of Lodi (Lombardy) with a net installed capacity of 1,140 MW.
- **Trapani (TP)** - located in the western part of Sicily, the power plant consists of two open cycle gas fired turbines with a net installed capacity of 213 MW and occupies an area of 9.2 hectares. The power plant was one of the first industrial sites in Sicily EMAS registered. After revamping, the efficiency of the plant has increased and its impact on the environment, while also provided benefits for the stabilization of the power grid, has reduced.
- **Scandale (KR)** - managed by Ergosud, a joint venture between EPH Group and A2A Gencogas S.p.A., it is situated in the central-eastern part of Calabria region. The plant, in operation since 2010, has two combined gas-steam cycles, that can potentially generate together, with a total capacity of 814 MW. It is a state-of-the-art thermal power plant, with a highly efficient and environmentally friendly technology.

Power plant	Fuel	Net Capacity (MW)
Livorno Ferraris ¹	Natural gas	805
Tavazzano e Montanaso	Natural gas	1,140
Ostiglia	Natural gas	1,137
Scandale ²	Natural gas	814
Trapani	Natural gas	213
Fiumesanto	Carbone	599
Total installed net capacity (MW)		4,708
Total operated capacity (MW)		4,301

2. Board of Management

The Management of EP Produzione it is composed of:

- **Peter Černák** – Chairman of the Board of Directors of EP Produzione and of EPH Group
- **Luca Alippi** – CEO of EP Produzione
- **Marek Spurný** – Board member of EP Produzione and of EPH Group
- **Marco Arcelli** – Board member of EP Produzione

3. EPH Group

Energetický a průmyslový holding (EPH) is a leading European energy group that owns and operates assets in the Czech Republic, the Slovak Republic, Germany, Italy, the UK, Ireland, France and Switzerland. EPH is a vertically integrated energy utility covering the complete value chain ranging from highly efficient cogeneration, power and heat generation, natural gas transmission, gas storage, as well as gas, heat and electricity distribution and supply. The scope includes also trading and logistics platforms, gas infrastructure management, and real estate development.

EPH is a monopoly gas distributor in Slovakia and sole power distributor in the region of central Slovakia. It is a market leader in gas and electricity distribution in Slovakia. EPH operates the longest gas transmission route in Europe. It is a leading major operator of district heating infrastructure in the Czech Republic and a market leader in gas storage in the region covering the Czech Republic, Slovakia, and Austria.

EPH comprises of over 70 companies, structured in four pillars: EP Infrastructure, EP Power Europe, EP Logistics International and EP Real Estate.

¹ EP Produzione owned capacity: 75%; EP Produzione operated capacity: 100%.

² EP Produzione owned capacity: 50%; EP Produzione operated capacity: 50%.

EPH key performance indicators 2021*

Consolidated Sales	€18.9 bn
EBITDA	€2.3 bn
Employees	~22.000
Installed capacity (net)	23.8 GW
Gas transmission capacity	73.7 bcm
Gas distribution	59.2 TWh
Gas storage capacity	64.2 TWh
Power production (net)	104 TWh
Power distribution	6.4 TWh
